

HyFlex[®] Foam

Excellent dexterity and breathability in very durable gloves

Intermediate Design

General purpose knitted and dipped gloves.

Ansell's popular HyFlex Foam 11-800 glove is designed for optimal results in dry or slightly oily applications that require light mechanical protection and high levels of handling finesse. It's ideally matched to the light assembly applications in automotive, plastics, textiles and finished goods industries, as well as to the needs of logistics and warehousing. For exceptional comfort, dexterity and durability, the HyFlex Foam 11-800 glove is the best choice.

Recommended Usage

Handling or light assembly applications in:

- logistics and warehousing
- automotive
- plastics
- textiles
- finished goods such as white goods, cosmetics... (ex: control and packaging stages)

New, improved HyFlex 11-800!

Highly durable

The HyFlex Foam 11-800 glove has an exclusive foam nitrile coating. This offers the very favourable resistance to abrasion rating of level 3 and a cut resistance level of 1 (based on EN standards), thus extending glove life.

Sure grip and dexterity

The foam nitrile coating provides a sure grip in dry or slightly oily environments. Designed to support excellent dexterity, the HyFlex Foam 11-800 glove ensures high levels of user performance.

Exceptionally comfortable and breathable

The unique foam nitrile coating is breathable, to maximise comfort and worker acceptance. The polyamide knitted liner provides flexibility.

Packaging

12 pairs per polybag, 12 polybags per carton
