

### Lightweight carabiners

Aluminum carabiners designed for workers at height.

NEW  
2017

### Ultra-light carabiners

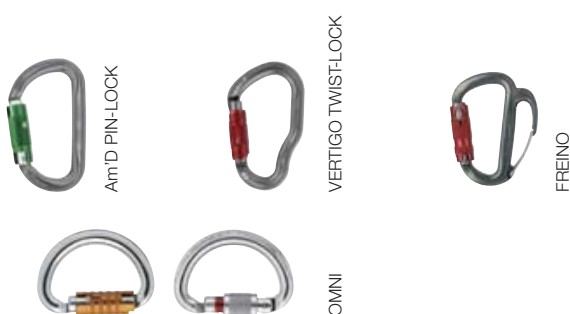

Compact aluminum carabiners for workers at height looking to reduce weight to a minimum.

NEW  
2017

### Special lightweight carabiners

Aluminum carabiners designed for specific uses: with groups, at the end of a lanyard, for additional braking on a descender, and for harness fastening.

### High-strength carabiners

Steel carabiners suitable for difficult environments, primarily used for setting up anchors and for connecting to metal structures.

NEW  
2017

### Large-opening connectors

Connectors designed for connecting to thick structures.

### Semi-permanent connectors

Connectors designed for semi-permanent connection of equipment.

### Connector positioning accessories

Accessories that keep the carabiner correctly positioned in devices and at the end of a lanyard.
