

# Touch N Tuff®

## Complex Design

Only 0.12 mm thick.  
Fits like a second skin - yet astonishingly tight.  
Safer for your products - safer for sensitive skin.  
Three times the puncture resistance of latex or PVC disposable.

### Recommended Usage

- Laboratory work
- Chemical industry
- Emergency services
- Electronics and other intricate assembly work

**TNT technology produces a remarkable new film only 0.12 mm thick.**

Unparalleled comfort and sensitivity, yet this super-light film is surprisingly strong.

**100% nitrile; no waxes, silicone or plasticizers.**

The proteins in latex and the plasticizers in vinyl can irritate skin and contaminate product. This pure nitrile film will do neither.

**Three times more resistant to puncture than latex or vinyl.**

Lighter and cooler, yet safer and more durable; better value for money.

**Far better chemical resistance than either latex or vinyl.**

Although not designed for immersion in chemicals, it offers valuable protection against accidental splashes.

**Computer designed.**

Designed for maximum freedom of movement and minimum hand fatigue.

**Rolled cuff.**

Provides added protection at wrist and ensures a secure fit.

**Available in both powdered and powder-free forms, to suit a very wide variety of applications.**

A light powdering inside the gloves makes them easier to put on. But powder-free remains the best option where there is any risk of irritation or product contamination.

**Light and comfortable for wearing as a liner.**

Double donning is the safest practice when handling very dangerous materials.

**Tested to an AQL of 1.0 for major visual defects.**

Guaranteed high standards of manufacture ensure reliability.

**Packaging**

100 gloves per sealed dispenser, 10 dispensers per shipping case.

### Specifications

Ref	Type	Style	EN Size	Length	Colour	Thickness
92-500	Powdered disposable	Textured fingertips	6.5-7, 7.5-8, 8.5-9, 9.5-10	240 mm	Green	0.12 mm
92-600	Powder-free disposable	Smooth	6.5-7, 7.5-8, 8.5-9, 9.5-10	240 mm	Green	0.12 mm
