Monitors HR 567 PN16

5200

Up to 4000 l/min., suitable for water and foam. Supply body with foldable feet and a monitor connected by means of self-locking quick connection coupling and can be comfortably separated. Both parts have carrying handles for transportation and are space saving foldable. Self locking vertical adjustments arrests the unit in any position. Built-in, removable locking device at +30°. Additional available roof flange allows easy mounting on fire truck roofs. Glycerine-filled gauge serially. Monitor without nozzle.

Storz System Connection or thread
